**MPool** Residential Pool Series

BRADFORD

**MPool** Attainable At-Home Luxury

Stunning stainless steel has never been more within reach than with the Bradford MPool. This innovative inground pool design has finally made luxurious stainless steel affordable within most residential pool budgets.

MPools offer a wide array of features and options to suit your vision. They are handmade from stress-free stainless steel for decades of enjoyment. Select from a variety of sizes and designs to make your Bradford MPool one-of-a-kind.

The MPool is fully prefabricated in our factory and delivered to your home ready to install. The MPool is designed with many of the same components and features as our commercial pools, so you know they will last a lifetime.

Bradford MPools are constructed of fully welded marine-grade stainless steel and finished with a sleek, buffed surface.

The MPool takes a fraction of the time to install versus a traditional concrete/shotcrete/gunite pool. This significant savings in installation time not only means you'll be swimming sooner, but also puts the overall pool budget on par with traditional pool construction methods.

MPool perimeter overflow creates a timeless and sophisticated architectural detail.  
Dimple steps provide a safe, non-slip surface.

The MPool is available with a traditional skimmer and freeboard design, as seen here.

The full-perimeter overflow design (shown left & top) creates a seamless transition from the deck to the water surface. This unique feature is an industry first for prefabricated residential in-ground pools, and only available from Bradford.

Bradford's stainless steel pools deliver first class durability, longevity, and corrosion resistance, while offering less maintenance and repairs than traditional concrete, shotcrete or gunite pools.

Stainless steel also features an impressive strength-to-weight ratio, further reducing construction costs and installation time. When properly maintained, Bradford stainless steel pools will never delaminate, crack, peel, discolor, leak or require renewing finishes.

Backed by our 25-year warranty, the stainless steel MPool gives homeowners an exceptional home aquatic experience and well-deserved peace-of-mind.

**Lengths:** 20' • 25' • 30' • 35' • 40'

MPools are 4'-6" constant water depth, with full-width dimpled entry steps as standard features.
